

Center for Immunology and Immune-based Diseases

12th Annual Retreat, August 15, 2024

Schedule

8:15-8:45am	Registration
8:45-9:00am	Introduction
9:00-10:00am	Plenary Speaker - Dr. June Round (University of Utah) , “ Microbiota-Immune interactions that promote health ”
10:00-10:15am	Coffee Break
10:15-10:30am	Abstract talk 1 - Sudeep Ghimire, “Specific Microbial Ratio in the Gut Microbiome is Associated with Multiple Sclerosis”
10:30-10:45am	Abstract talk 2 - Natalie Jarvis, “Dietary effects on the course of visceral leishmaniasis in a mouse model”
10:45-11:00am	Abstract talk 3 - Kyra Watral, “Enteral supplementation with bovine lactoferrin or glutamine alters neonatal iron status, intestinal permeability and sepsis-related mortality in a mouse model”
11:00-11:15am	Abstract talk 4 - Shravan Kannan, “Naïve CD4 T cell maintenance and function sustain long-term impairment post whole-body irradiation”
11:30-1:00pm	Lunch
1:00-2:00pm	Plenary Speaker - Dr. Vijay Kuchroo (Harvard University) , “ Checkpoint molecules, Tregs, and induction of anti-tumor immunity ”
2:00-2:15pm	Coffee Break
2:15-2:30pm	Abstract talk 5 - Kiarash Salari, “Dual role of oncogene SETDB1 in promoting endometrial cancer progression: enhancing proliferation and mediating immune evasion”
2:30-2:45pm	Abstract talk 6 - Jonah Elliff, “Acute malaria suppresses protective antibody responses elicited by the Ebolavirus vaccine”
2:45-3:00pm	Abstract talk 7 - Payton Kahl, “Identification and Analysis of T Cell Epitopes in Influenza B Virus”
3:00-3:15pm	Abstract talk 8 - Madison Mix, “Choline acetyltransferase expressing T cells infiltrate the brain during acute and chronic viral encephalitis”
3:15-4:00pm	Poster Session 1 (Odd numbers)
4:00-4:45pm	Poster Session 2 (Even numbers)
4:45-6:00pm	Social Hour
